

# Rapid Prototyping - DIMENSION uPRINT

FAST, AFFORDABLE 3D MODEL PRINTING

## The NEW Dimension uPrint™ 3D Printer

The new uPrint™ 3D Printer is compact enough to fit on your desktop. It is simple enough for hassle-free set-up and operation and - best of all - it is affordable enough for most educational users. The uPrint™ is simple to use and allows you to bring CAD files and design ideas to life right from your desktop - simply click 'print' and your design is sent to the uPrint™ for manufacture!

Prices from only £12,500\*

uPrint™ models are made in *ABSplus* thermoplastic and are tough enough for functional testing under real-world conditions. Models can be drilled, machined, sanded, painted, and even chrome plated!

Larger-format Dimension printers are also available, including the 1200es series machines, which are available with colour-matched stands. The 1200es machines are available with either BST (Break-away Support Technology), or SST (Soluble Support Technology).

Dimension machines are virtually maintenance free, and the *ABSplus* consumable materials are offered as affordable "off the shelf" consumable items.

For more information, contact the Denford Sales Team on: 01484 728000

\* SST Clean Station available at £990  
Prices excluding VAT.

1200es machines are shown with optional colour-matched stand.
