

the above is what starmill program from download section kicked up

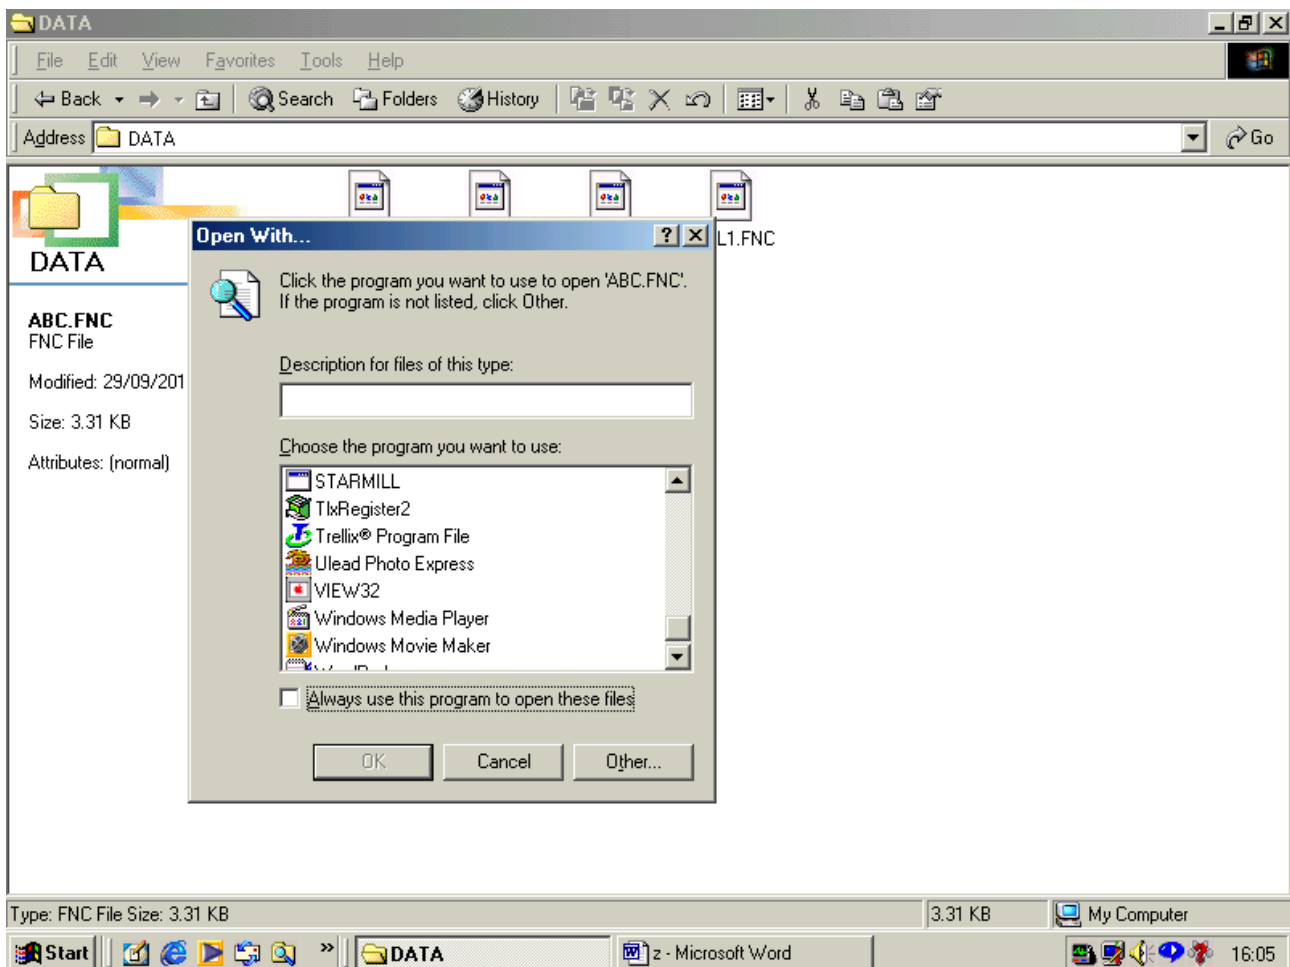

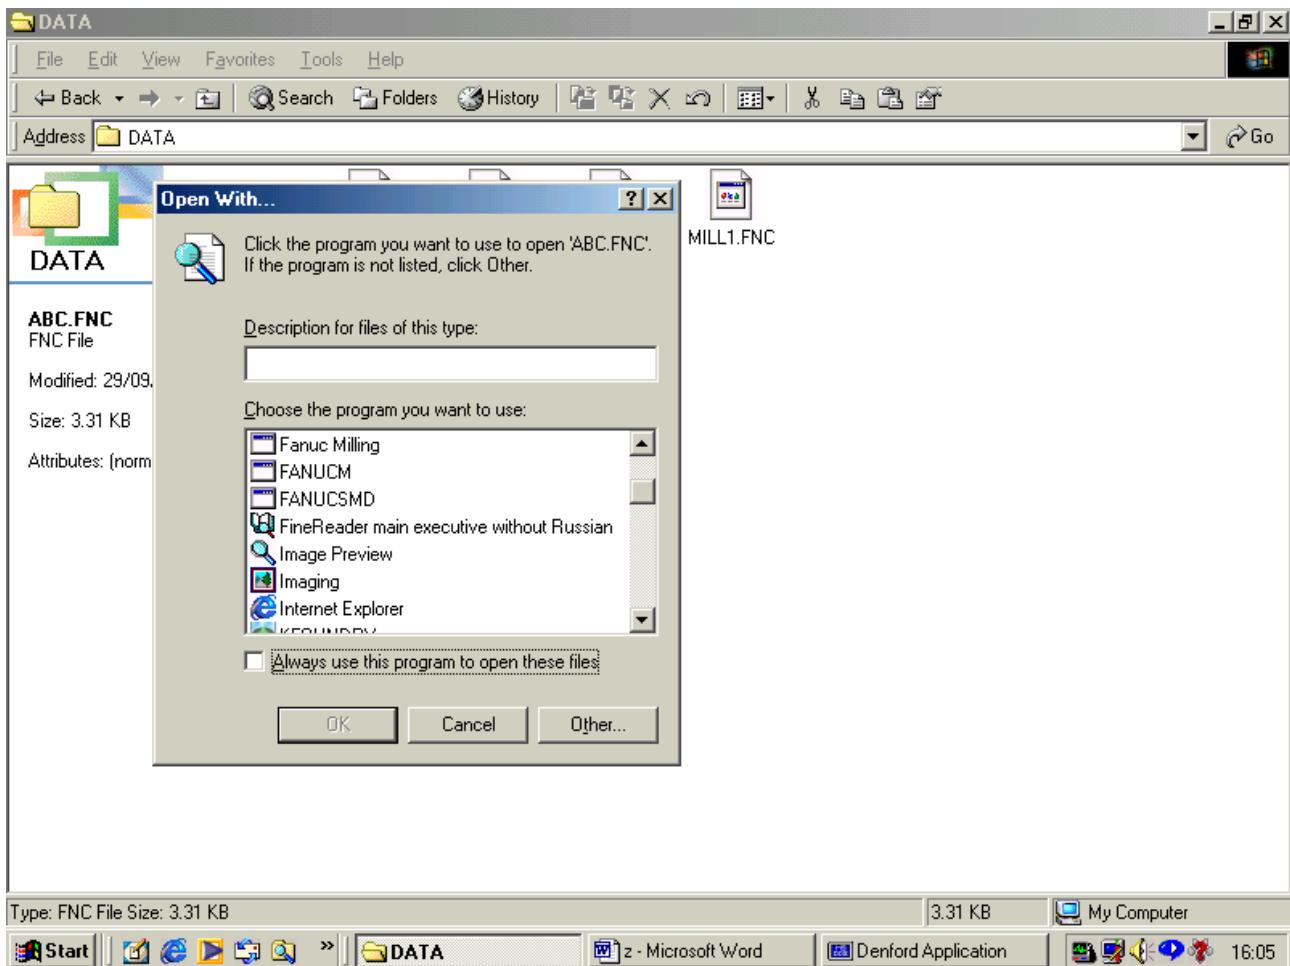

this was kicked up when I tried to open a g code .fnc thing with fanucsmd

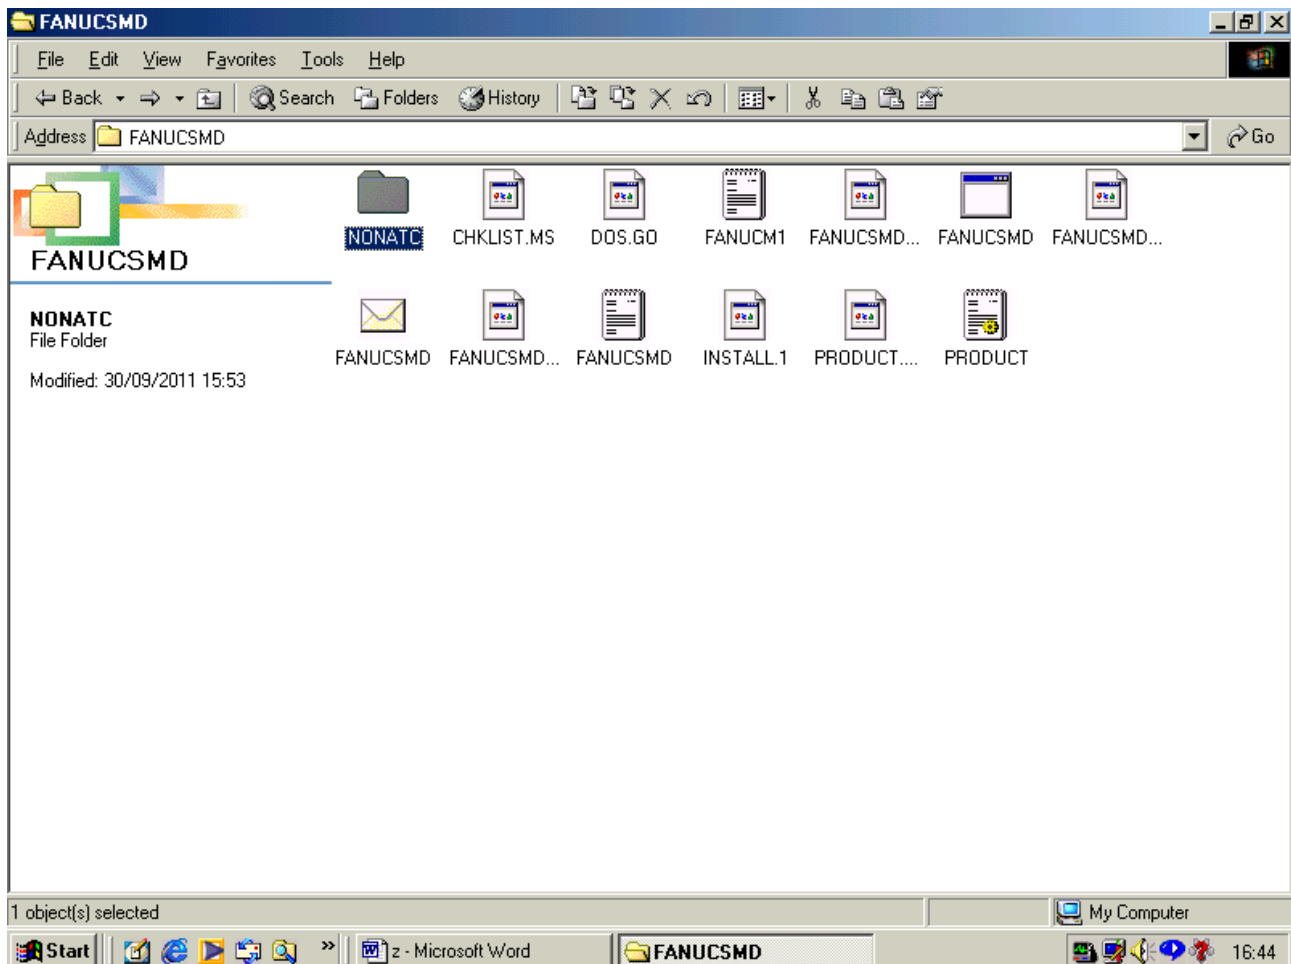

this is fanuc milling as installed on machine.
And when I try to open abc.fnc with it, it gives this:

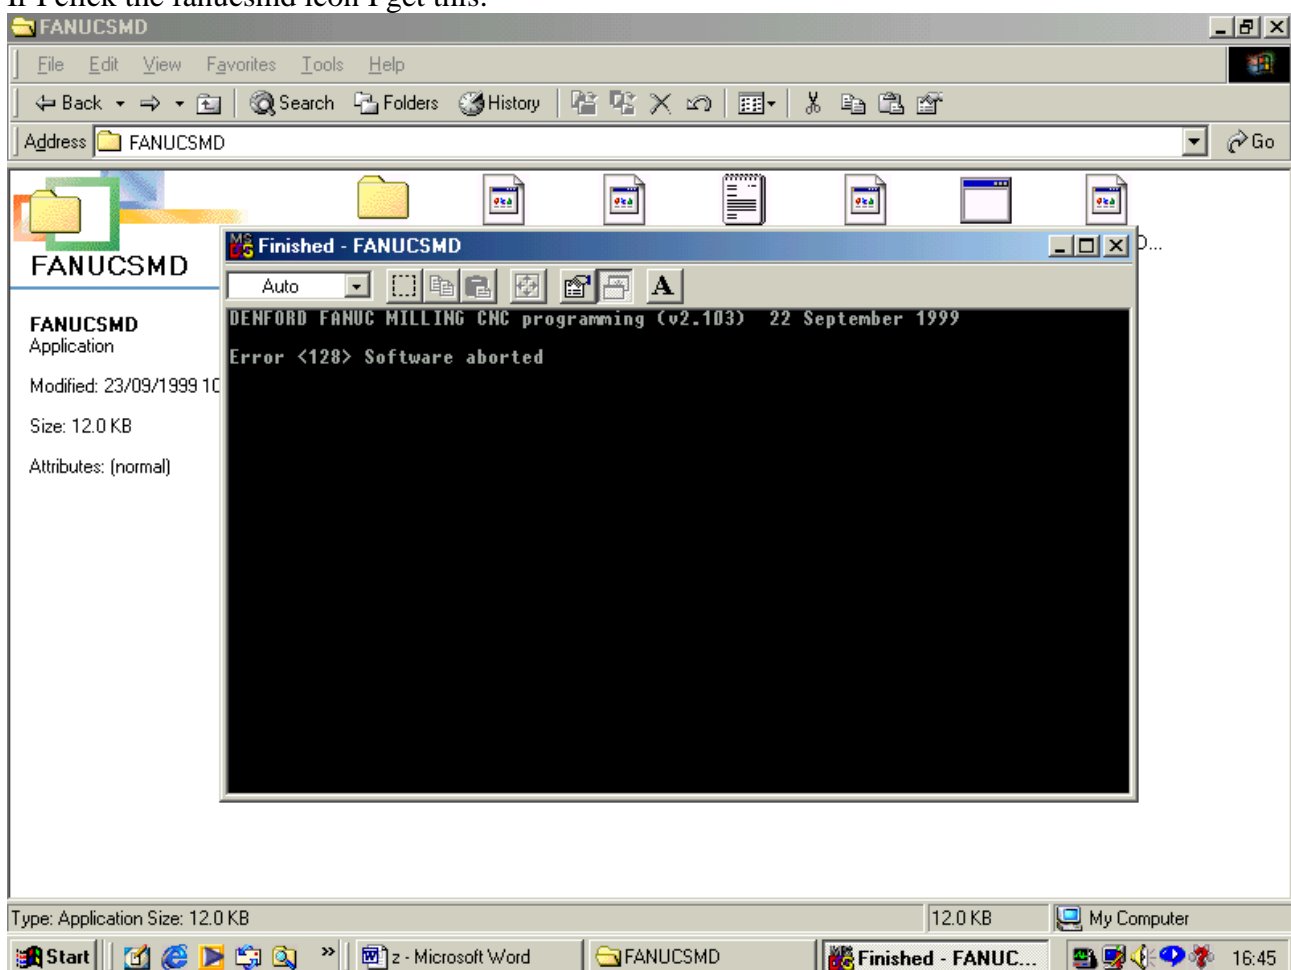

nothing working so I opened the fanucsmid folder and got this:

what do I do now?

If I click the fanucsmid icon I get this:

I tried fanuc go but I got this
